

Streamline Your Sample Preparation

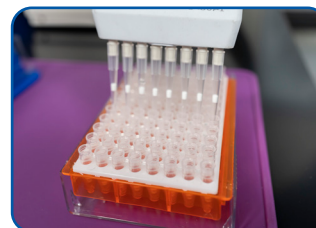

The PCR® Transfer Tray is engineered for quick and convenient handling of PCR tubes and strips. Designed to sit securely on 96-well tube racks and thermal cyclers, it simplifies the transfer process and works seamlessly with 96-well lidded storage trays

- Tubes: 0.2 mL; accommodates individual tubes or strips of 8 and 12
- Material: Polypropylene
- Color: Natural
- Cleaning Instructions: Use a pH neutral cleaner (solvents not recommended)

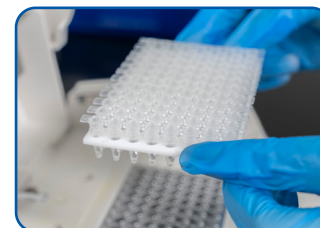

Set

Place sample tray over 96-well tube rack

Prep

Prepare test samples, place and fill PCR tubes

Transfer

Transfer conveniently and safely to/from thermocycler for processing and storage

Pack of 5
